

Zinc Die-Cast EMT Compression Coupling

This EMT coupling joins two lengths of EMT conduit, ensuring a secure connection. The zinc die-cast construction offers corrosion resistance and durability for both indoor and outdoor applications.

General Information

Reliable EMT Connection

This Zinc Die-Cast EMT Compression Coupling is designed to provide a secure and durable connection for EMT conduits to boxes or enclosures. Constructed from high-quality materials, it ensures excellent corrosion resistance and features a smooth inner layer to facilitate easy wire pulling. Its compression design allows for a reliable installation without the need for complex threading tools.

Technical Specifications

Material	Zinc Die-Cast / Steel
Color	White
Key Features	Corrosion Resistant, Smooth Inner Layer, Compression Type
Usage	Connect EMT tubes to a box or enclosure

Identification

Model Number	513-DC
Size	3/4"
