Product Overview

Professional EMT Coupling Solution

This Zinc Die-Cast EMT Set Screw Coupling is engineered to provide a secure and rigid connection between two sections of EMT conduit. Designed for electrical raceways, it ensures proper grounding and robust protection for conductors in both indoor and outdoor applications. The set screw mechanism facilitates straightforward installation and removal, while the high-quality zinc construction offers excellent corrosion resistance and long-term durability.

Technical Specifications

Material	Zinc Die Cast / Steel
Color	White
Key Features	Corrosion Resistant, Smooth Inner Layer, Flexible Screw, Easy Installation

Application

Environment

Indoor • Outdoor • Dry Locations

Primary Usage

Connect EMT tubes to a box or enclosure

Available Sizes

Common Sizes

- 1/2"
- 1 1/2"
