

Zinc Plated Steel Roofing Bolt with Square Nut

This roofing bolt is made of steel and comes with a square nut. It is available in bright zinc plated, self-colour, yellow zinc plated, and hot dipped galvanized finishes.

Product Overview

Reliable Fastening Solutions

The Zinc Plated Steel Roofing Bolt with Square Nut is designed for secure fastening applications, particularly in roofing and construction projects. These bolts feature a fully threaded shank that allows for precise, adjustable positioning of the included square nut. With multiple available finish options, this product provides versatile corrosion resistance to suit various environmental conditions.
