

Zinc-Plated Warehouse Trolley with 200kg Capacity

This warehouse trolley is designed for transporting goods and materials within a warehouse or industrial setting. Constructed with a durable metal frame and swivel casters, the trolley's platform supports loads up to 200kg.

Product Overview

Professional Material Handling Solution

This zinc-plated warehouse trolley is engineered for durability and efficiency in demanding industrial environments. With a robust 200kg load capacity and high-quality TPU casters, it ensures smooth and reliable transport of heavy goods. The versatile design features a modular construction with available accessories like a trolley locker and customizable handle branding, making it an ideal choice for diverse warehouse operations.
