

ZX7200 Welding Machine with Inverter Technology

The ZX7200 is a versatile welding machine designed for efficient and precise welding operations. Featuring advanced inverter technology, it provides stable and reliable performance for various welding applications.

Product Overview

Professional Inverter Welding Performance

The ZX7200 is a versatile welding machine designed for efficient and precise operations. Featuring advanced inverter technology, it provides stable and reliable performance for a wide range of welding applications. Its compact and robust construction ensures both durability and portability, making it an excellent choice for demanding professional projects.

Technical Specifications

Technology Type	Inverter DC Manual Welding
Operational Features	Adjustable Current, Digital Display, Portable Design, High Efficiency
