

0-150mm Digital Vernier Caliper

This digital vernier caliper offers stable and high-accuracy measurements with its glass fixed grid. The measured value is quickly displayed on an LCD screen.

Product Overview

Precision Digital Measurement

This high-accuracy digital vernier caliper offers a versatile measuring range of 0-150mm (0-6 inches), making it an essential tool for engineering, machining, and quality control applications. It features a clear digital display for easy reading and supports both metric and imperial measurement systems. Designed for durability and convenience, it includes IP54 waterproof protection and an energy-efficient battery system.
