Overview

High-Efficiency Vortex Water Pump

This 0.37kW vortex water pump is engineered for reliable domestic water supply and pressure boosting applications. Featuring a robust single-stage design, it is optimized for handling clean water efficiently in residential settings. Its compact construction ensures straightforward installation and long-lasting performance for home use or small-scale irrigation.

Technical Specifications

Power Rating

0.37 kW
Power

0.5 hp
Horsepower

Voltage	220 V
Pump Structure	Single-stage
Pressure Capability	High Pressure

Operating Environment

Recommended Applications	Family Homes, Clean Water, Pressure Boosting, Domestic Water Supply
