Product Overview

Professional-grade pump solutions suitable for various industrial and residential fluid transfer needs.

High-Efficiency 0.5 HP Automatic Water Pump

The PS138 automatic electric water pump is a robust solution engineered for reliable water management in residential, agricultural, and light industrial settings. With a powerful 0.5 HP motor, this unit is designed for efficient water boosting and transfer applications. The integrated automatic control system provides convenient operation and ensures long-term usability, making it an ideal choice for pressure boosting and general irrigation tasks.

Technical Specifications

Power Output

0.5 HP

Motor Power

Model Number

PS138

Features

Key Features

Automatic Control, Water Boosting, Pressure Management, Easy Installation, Low Maintenance

Applications

Suitable Applications

- Residential Water Boosting
- Agricultural Irrigation
- Light Industrial Water Transfer
