

0.5T Air Hydraulic Telescopic Transmission Jack

This 0.5T air hydraulic telescopic transmission jack is designed for removing, installing, and transporting transmissions and differentials. It features a telescopic design for increased lift range and air-hydraulic operation for effortless lifting.

Overview

Professional Transmission Handling

This 0.5T air hydraulic telescopic transmission jack is designed for removing, installing, and transporting transmissions and differentials on passenger cars, trucks, and buses. Featuring a telescopic design for increased lift range and air-hydraulic operation for effortless lifting, this jack provides precise control and stability during operation. The wide base and heavy-duty casters ensure stability and easy maneuverability in the workshop, while integrated safety features include overload protection and a safety chain to secure the load.
