

0.6/1KV Armored Power Cable

This armored power cable is designed for 0.6/1KV applications. Its robust construction and armored layer make it suitable for underground or direct burial installations.

Product Overview

High-Performance Armored Power Cable

This 0.6/1KV armored power cable is specifically engineered for reliable power transmission in demanding outdoor and underground environments. Featuring a robust armor layer, it is designed to withstand significant external mechanical forces, making it ideal for direct burial installations. The three-core copper conductor construction ensures efficient electrical performance and durability for industrial applications.

Technical Specifications

Voltage Rating

0.6 kV

Low Voltage (Uo)

1 kV

Low Voltage (U)

Core Configuration	3 Cores
Conductor Cross-Section	240 mm ²

Construction Details

Insulation Color Coding	Red, Yellow, Green
Conductor Material	Copper

Installation & Environment

Installation Method

- Outdoor laying
- Underground burial
- Direct burial

Mechanical Protection

Armored Layer • External Force Resistant

Application Suitability	Designed to bear external mechanical forces in demanding environments.
