

0.6L Grind and Brew Coffee Maker with Conical Burr Grinder

This compact coffee maker grinds and brews directly for optimal flavor. It features a 0.6L capacity and conical burr grinder.

Overview

Compact Grind & Brew Experience

This 0.6L coffee maker offers a seamless transition from bean to cup with its integrated conical burr grinder. Designed for both convenience and quality, it allows users to customize their brew with three distinct granule thickness levels and an aroma enhancement function. With programmable pre-set options, an anti-drip mechanism, and a helpful cleaning notification, this machine is an ideal solution for fresh, daily coffee preparation.
