

# 0.8mm 60/40 Tin Lead Solder Wire Spool

This solder wire is designed for electronics and general soldering applications. It features a 60% tin alloy composition for reliable and strong solder joints.

## Product Overview

### Professional Soldering Performance

This 60/40 tin-lead solder wire is engineered for high-performance soldering in electronics and general electrical applications. With a precise 0.8mm diameter and balanced alloy composition, it ensures strong, durable joints and excellent electrical conductivity. The spool packaging provides convenient handling and organization for professional technicians and hobbyists alike.

## Technical Specifications

### Alloy Composition

<b>60 %</b> Tin Content	<b>40 %</b> Lead Content
----------------------------	-----------------------------

### Physical Properties

Property	Value
Diameter	0.8mm
Net Weight	200g
Flux Content	2.0%

## Product Information

### Packaging Format

Spool Dispensing

<b>Model Details</b>	420401 (Standard)
<b>Recommended Applications</b>	Electronics Repair, General Soldering, Circuitry
