

0.9kW Single-Phase Diesel Generator

This is a compact and reliable diesel generator. It has a rated power of 0.8kW and a maximum power of 0.9kW, operating at 50Hz and 220V with AVR.

Overview

Compact Power Solution

This 0.9kW single-phase diesel generator is designed for reliability and stable performance in compact environments. Featuring an Automatic Voltage Regulator (AVR), it ensures a consistent 220V power output, making it suitable for sensitive equipment. Its efficient design and robust construction make it an ideal choice for portable power needs.
