Product Overview

Versatile Material Handling Solution

This 1-3.5 Ton internal combustion forklift utilizes a flexible dual-fuel system, allowing operation on both LPG and gasoline. Designed for durability and efficiency, the combustion process is optimized to extend engine lifespan significantly compared to standard models. It offers a cleaner operating environment than diesel alternatives and provides longer continuous runtimes than electric forklifts, making it an ideal choice for demanding industrial, warehousing, and construction applications.

Performance & Capacity

Lifting Capacity

3.5 Ton Max Lifting Capacity	1 Ton Min Lifting Capacity
