

1 Gang Single/2 Way Surface Mount Light Switch

This surface-mounted switch supports both single and two-way operation. Constructed from durable, fire-resistant thermoplastic, it is suitable for residential and commercial applications.

Product Overview

Robust Surface-Mounted Switching Solution

This 1-gang surface-mounted switch is engineered for versatility and durability in demanding environments. Featuring an IP65 rating for dust and water protection, it is constructed from fire-resistant, UV-stabilized thermoplastic to ensure long-term reliability. With a modular design and multiple terminal options, this switch is suitable for both residential and commercial electrical installations requiring high safety standards.

Technical Specifications

Ingress Protection

IP65

Fire Resistance Rating	850
Dielectric Strength	2000 V
Tested Lifetime	40000 cycles
Operating Temperature Range	-15 to 45 °C
Storage Temperature Range	-20 to 50 °C

Compliance & Quality

Warranty Period

10 years

Mechanical Switch/Socket

2 years

Electronic Items

Certifications

TUV, CE, RoHS

Installation & Design

Terminal Options

- Screw Terminal
- Screw-less Terminal

Mounting Orientation

- Vertical
- Horizontal

Material	PC-UV Thermoplastic (Halogen-free)
Cable Capacity	Æ4-Æ20
