Product Overview

Professional Vortex Water Pump

This high-performance vortex water pump is engineered for efficient clean water transfer and pressure boosting. Featuring a reliable single-stage design, it is ideal for residential water supply, irrigation, and various industrial applications. Its compact construction ensures easy installation, while the high-pressure capability provides consistent and durable performance for long-term operation.

Technical Specifications

Core Metrics

1 HP Horsepower	0.37 kW Power Output	220 V Voltage
---------------------------	--------------------------------	-------------------------

Design & Usage

Feature	Specification
Structure	Single-stage Pump
Pressure Type	High Pressure
Power Source	Electricity

Certifications & Logistics

Certifications	CE
Monthly Supply Ability	5000 Units
