

1 Pole 10 Amp Miniature Circuit Breaker

This 1 pole, 10 amp miniature circuit breaker is designed for residential and commercial electrical protection. It provides overload and short-circuit protection to prevent electrical hazards and equipment damage.

ADDITIONAL IMAGES

General Overview

The series includes a comprehensive range of MCB and RCCB configurations to suit various electrical protection requirements.

Reliable Circuit Protection

This miniature circuit breaker provides essential electrical protection for residential and commercial systems. Engineered with high-quality copper and flame-retardant materials, it ensures safety by effectively preventing electrical hazards and equipment damage. The unit features a clear ON/OFF indicator and is designed for quick power-off response times, ensuring robust performance in demanding electrical environments.

Technical Specifications

Engineered for rapid response, ensuring power-off in just 0.1 seconds.

Rated Current	10 A
Pole Configuration	1 Pole
Breaking Capacity	4000 A
Rated Voltage	230V~
Operating Frequency	50 Hz

Safety & Compliance

Designed with a flame-retardant shell and visual inspection window for enhanced safety and monitoring.

Compliance Standards

IEC 60898-1 • GB/T10963.1

Key Safety Features

- Clear ON/OFF indicator
- Big heat-proof housing
- Low temperature rise design
- Quick power-off mechanism

Power-off Response Time	0.1 seconds
Construction Materials	Flame retardant housing, High quality copper
