

1-Pole 20A HVAC Definite Purpose AC Contactor

This is a 1-pole AC contactor with a 20A current rating. It is designed for definite purpose applications in HVAC systems.

Product Overview

HVAC Definite Purpose Contactor

This 1-pole magnetic AC contactor is engineered specifically for HVAC&R applications, providing reliable switching and control for hermetic refrigeration compressors. Designed for demanding environments, it supports a 20A current rating and operates efficiently at 208/240VAC. With robust construction and clear terminal markings, this component ensures straightforward installation and consistent performance in climate control systems.

Electrical Specifications

Rated Current	20 A
Pole Configuration	1-Pole
Coil Voltage	208/240VAC 50/60Hz
Resistive Amps	50 A
