

1-Pole HVAC Definite Purpose Contactor

This 1-pole magnetic contactor is CUL certified for HVAC applications. It is designed for reliable switching in heating, ventilation, and air conditioning systems.

Overview

Reliable HVAC Switching Solution

This 1-Pole Definite Purpose Contactor is engineered specifically for HVAC&R applications, providing reliable switching for air conditioning and heating systems. It features a robust design certified to CUL standards, ensuring safety and performance in demanding environments. With flexible voltage compatibility and high resistive amperage ratings, it is an ideal component for professional electrical installations.

Technical Specifications

Key Performance Metrics

30 A

Full Load Amps (FLA)

45 A

Resistive Amps

1 P

Number of Poles

Voltage and Load Ratings

Voltage (VAC)	Full Load Amps (FLA)	Locked Rotor Amps (LRA)
277	30	180
480	30	150
600	30	120

Coil & Electrical

Coil Voltage Range	208/240VAC
Frequency	50/60Hz

Compliance & Quality

Certifications

CUL Certified • 100% Self-Inspection

Service & Customization

Available Services

OEM, ODM, Free Samples, Quality Guarantee

Logistics

Delivery and Payment

- Lead time: 15-20 days after deposit
- Payment: 30% deposit, balance against B/L copy
- Shipping: Customer pays for sample shipping
