

# 1-Ton Compact Mini Excavator

This compact mini excavator has a 1-ton operating weight. It features a robust hydraulic system and durable tracks for efficient excavation.

## ADDITIONAL IMAGES

## Product Overview

### Compact Versatility

This 1-ton mini excavator is engineered for efficiency in confined spaces, making it an ideal solution for landscaping, agricultural tasks, and municipal construction projects. Its robust hydraulic system and durable track design ensure reliable performance in challenging environments, such as greenhouses or narrow job sites. Whether used for digging, loose soil management, or concrete pavement crushing, this machine delivers consistent power and maneuverability.

## Key Specifications

### Operating Weight

**1 Ton**

Operating Weight

### Model Identifier

CX10T

## Applications

### Suitable Applications

Greenhouse Soil Loosening, Campus Greening, Tree Planting, Concrete Pavement Crushing, Sand-Gravel Mixing, Construction in Narrow Spaces

## Equipment Features

### Standard Attachments

- Digging Bucket
- Dozer Blade
- Auger Attachment

### Design Features

Robust Hydraulic System • Durable Tracks • Compact Design • User-Friendly Controls
