

1-Ton Double Pallet Electric Stacker

This electric stacker efficiently lifts and moves materials in warehouses. Its double-pallet design increases productivity by handling two pallets simultaneously, optimizing space utilization.

Overview

Versatile Double-Pallet Handling Solution

The FBD10JS is a 1-ton electric stacker specifically designed to optimize productivity through its double-pallet handling capability. Its compact design and small turning radius make it an ideal choice for navigating tight spaces in warehouses and distribution centers. With a focus on stability and ease of maintenance, this stacker ensures efficient material flow and maximized space utilization.

Performance & Capacity

Key Performance Metrics

1 Ton

Load Capacity

3 m

Lifting Height

Technical Dimensions

Fork Specifications

Dimension Type	Measurement
Fork Size	1070 x 180 x 60 mm
Fork Leg Distance	650 mm

Design Features

Operational Advantages

- Double pallet function for high passability
- Low center of gravity for enhanced vehicle stability
- Adjustable balance wheel function
- Small turning radius for narrow aisle operation

Maintenance & Battery

Maintenance & Battery Access

- Side-extractable battery for convenient exchange
- Easy-open side door and battery box cover
- Simplified maintenance access for reduced downtime

Safety & Compliance

Safety Features

High Stability, Quiet Operation, Precise Controls, Indoor Optimized
