

# 1-Ton Foldable Hydraulic Engine Crane

This 1-ton foldable hydraulic engine crane is designed for lifting and positioning engines and other heavy components. Its foldable design allows for convenient storage, and it features a robust hydraulic system for smooth, controlled lifting.

## ADDITIONAL IMAGES

## Overview

### Professional 1-Ton Hydraulic Lifting Solution

This 1-ton foldable hydraulic engine crane is a versatile and essential tool for any automotive or mechanical workshop, designed for lifting and positioning engines and heavy components. It features a robust hydraulic system for smooth, controlled lifting and a heavy-duty steel frame for maximum durability. The foldable design ensures convenient storage in space-constrained environments, while the adjustable boom provides flexibility across various lifting capacities.

## Key Performance Metrics

### Lifting Capacity

**1 Ton**

Maximum Capacity

**1000 kg**

Weight Rating

## Technical Specifications

Construction Material	Heavy-duty steel construction
Mobility	4 swivel casters for easy maneuvering
Product Weight	71 kg
Adjustable Boom Settings	1 Ton, 3/4 Ton, 1/2 Ton, 1/4 Ton

## Safety & Features

### Safety Systems

- Clevis grab hook with safety latch
- Pressure relief valve to prevent overloading
- Locking mechanism to secure boom position
- Sturdy base for stability during operation

## Storage & Logistics

### Package Dimensions

Package No.	Dimensions (mm)
Box 1	760 * 380 * 160
Box 2	1400 * 300 * 200

Foldable

Yes

## Applications

### Primary Applications

Engine Swaps • Automotive Repair • Industrial Lifting • Workshop Maintenance
