

1-Ton Mini Dumper with Cabin

This 1-ton mini dumper features a driving cabin for operator comfort and protection. The machine is designed for efficient material handling in confined spaces, with a robust chassis and powerful engine for maneuverability and stability.

Overview

Compact and Versatile Material Handling

The SD10-9DA (FC1A) is a robust 1-ton mini dumper designed for efficient material transport in confined spaces such as construction sites, landscaping projects, and agricultural environments. It features a durable chassis and a 4x2 drive system, ensuring excellent maneuverability with a turning radius of 4 meters or less. Equipped with a steel driver shield and ergonomic seating, this dumper prioritizes operator comfort and safety while maintaining high productivity on various terrains.

Performance Highlights

Performance Metrics

1000 kg

Payload Capacity

23 km/h

Max Speed

Engine Specifications

Engine Model	S195NM
Engine Type	Horizontal single-cylinder four-stroke radiator water-cooled
Rated Power	8.8 kW
Rated Speed	2000 rpm

Technical Dimensions

Tread Width

Position	Width (mm)
Front	1320
Back	1290

Overall Size (L*W*H) 2650 * 1600 * 2074 mm

Wheel Base 1500 mm

Operational Details

Transmission	3 front speeds + 1 reverse speed
Bucket Capacity	0.47 m3
Min. Turning Radius	<= 4m

Features & Equipment

Standard Configuration

- Mechanic tipping hopper
- Electric starting engine
- Steel driver shield
- Full engine casing
- Ergonomic seat
