

10-15kVA Double Cylinder Silent Diesel Generator

This diesel generator provides stable and consistent power output. Its silent operation is achieved through an enclosed soundproof canopy, minimizing noise pollution.

Product Overview

High-Performance Silent Power Generation

This double-cylinder silent diesel generator series offers robust and reliable power solutions ranging from 10kVA to 15kVA. Engineered for noise-sensitive environments, it features an enclosed soundproof canopy that significantly reduces noise pollution during operation. The unit integrates a 100% copper alternator for stable inductive load handling, supported by an advanced automatic voltage regulator for consistent output.

Performance Metrics

Available Capacity

- 10 kVA
- 12 kVA
- 15 kVA

Voltage Rating

400 V

Technical Specifications

Engine Configuration: Double Cylinder

Alternator Winding: 100% Copper

Start Type: Electric Start

Safety and Protection

Noise Level

Silent Operation • Soundproof Canopy

Protection Systems

Low Oil Alarm, Automatic Voltage Regulation, Overload Protection, Short Circuit Protection
