

10-Inch 500W Car Subwoofer

This 10-inch car subwoofer features a 20oz magnet and 1.5-inch voice coil. With a frequency response of 30-20000Hz and 90dB impedance, it delivers powerful audio.

Overview

High-Performance 10-Inch Subwoofer

This 10-inch subwoofer is engineered to deliver deep, accurate bass response with minimal distortion for automotive audio systems. Featuring a robust carpeted speaker box and a high-excursion driver, it is built to withstand the rigors of daily use in vehicle environments. With a 500W power rating and versatile frequency response, it provides a reliable solution for enhancing in-car sound quality.

Audio Performance

Maximum Power	500 W
Frequency Response	30-20000Hz
Sensitivity	90 dB
Impedance	4 ohm

Technical Specifications
