Product Overview

Compact Precision Cutting Solution

Designed for small to medium-sized workshops, this 10-inch compact panel saw combines power and precision in a space-saving footprint. It features a robust cast iron table and a 48-inch sliding beam, allowing for accurate and repeatable cuts on large panels up to 8'x4'. With a quiet induction motor and integrated dust extraction, it provides a stable, clean, and efficient working environment for professional woodworkers.
