

10-Inch Contour Gauge for Precise Shape Duplication

This 10-inch contour gauge is designed for precisely duplicating shapes and profiles. Its high-density pin array ensures accurate tracing for applications like woodworking and tile fitting.

Product Overview

Precision Shape Duplication

This 10-inch contour gauge is designed to simplify complex shape replication for professional projects. It features a high-density pin array that allows for accurate tracing of irregular profiles. Ideal for woodworking, tile fitting, and flooring installation, this tool ensures precise measurements and seamless fits every time.

Technical Specifications

Gauge Length	10 inch
Material Options	ABS Plastic, Metal

Available Variants

Available Sizes

- 5 inch
- 6 inch
- 10 inch

Key Features

Ideal Applications

Woodworking • Tile Fitting • Flooring • Shape Tracing
