

10-Inch Grinding Wheel with 1-1/4 Inch Arbor

This grinding wheel is 10 inches in diameter, 1 inch thick, and has a 1-1/4 inch arbor hole. It is made from high-quality abrasive materials for effective sharpening, shaping, and finishing.

Product Overview

High-Performance White Aluminum Oxide Wheel

This 10-inch grinding wheel is engineered with high-purity white aluminum oxide, specifically designed for demanding grinding applications. It excels in processing high-hardness materials, including high-speed steel, high-carbon steel, hardened steel, and various alloy steels. Its robust construction ensures efficient material removal and precise finishing, making it a reliable choice for professional sharpening and shaping tasks.

Dimensions & Compatibility

| | |
|------------|-----------|
| Diameter | 10 inch |
| Thickness | 1 inch |
| Arbor Hole | 1.25 inch |

Material & Application

Primary Applications

- Sharpening
- Shaping
- Finishing

| | |
|--------------------|--|
| Abrasive Material | White Aluminum Oxide |
| Suitable Materials | High-Speed Steel, High-Carbon Steel, Hardened Steel, Alloy Steel |

Customization

Available Shapes

Parallel Cup • Cup • Cylinder
