

# 10-Inch Woodworking Handscrew Clamp

This 10-inch handscrew clamp is ideal for woodworking, holding irregular shapes and delicate surfaces. It features hard maple jaws and steel spindles to provide even pressure and prevent marring.

## ADDITIONAL IMAGES

## Product Overview

### Professional Handscrew Clamp

This 10-inch handscrew clamp is engineered for precision woodworking, offering superior reach and even pressure distribution across broad areas. Its adjustable jaw angle allows for secure clamping of odd-shaped workpieces, while the seasoned hard maple jaws protect finished surfaces from marring. Featuring robust steel spindles and ergonomic wooden handles, this tool provides the control and durability required for intricate furniture assembly and cabinet projects.

## Technical Specifications

Jaw Length	10 in
Jaw Material	Seasoned Hard Maple
