

10 m2 Industrial Kiln

This industrial kiln has a 10 m2 capacity for high-temperature processing. It features a multi-level structure with interconnected piping systems.

Product Overview

Industrial Kiln Solution

This 10 m² industrial kiln is designed for high-capacity thermal processing within industrial environments. The robust structure features a multi-level framework supported by reinforced concrete pillars, ensuring stability and durability during operation. It includes integrated piping systems and adheres to rigorous safety standards for professional industrial use.

Technical Specifications

Kiln Capacity	10 m2
Construction Materials	Concrete, Steel Framework, Industrial Piping
