

# 10-Ton Capacity Tower Crane with 60m Span

This tower crane has a maximum lifting capacity of 10 tons and a 60-meter span. It is designed for use in construction projects and features a robust structure for lifting heavy materials.

## Overview

### High-Capacity Tower Crane Solution

This 10-ton capacity tower crane is engineered for robust performance in demanding high-rise construction environments. Featuring a 60-meter span and a maximum lifting height of 100 meters, it offers the reach and power necessary for complex material handling. The system integrates high-quality electrical components and advanced welding techniques to ensure operational safety and reliability on the job site.

#### Condition

New

#### Place of Origin

Shandong, China

## Performance Metrics

### Core Performance Metrics
