

10-Ton Hydraulic Uncoiler Decoiler

This 10-ton hydraulic uncoiler decoiler efficiently unwinds and decoils metal coils. Its hydraulic system ensures smooth, controlled operation for consistent material feeding.

Overview

The heavy-duty 10-ton hydraulic uncoiler featuring a robust frame and hydraulic expansion mandrel.

Heavy-Duty 10-Ton Hydraulic Decoiler

This 10-ton hydraulic uncoiler is engineered for high-capacity industrial applications, providing smooth and controlled unwinding of metal coils. Featuring a robust hydraulic expansion system, it ensures secure coil clamping and precise material feeding into downstream processes like roll forming or stamping. Its durable construction and motorized feeding system make it an essential component for maintaining consistent production efficiency in demanding environments.

Technical Performance

Detail of the hydraulic expansion system designed for secure clamping of heavy metal coils.

Key Performance Metrics

10 Tons

Load Capacity

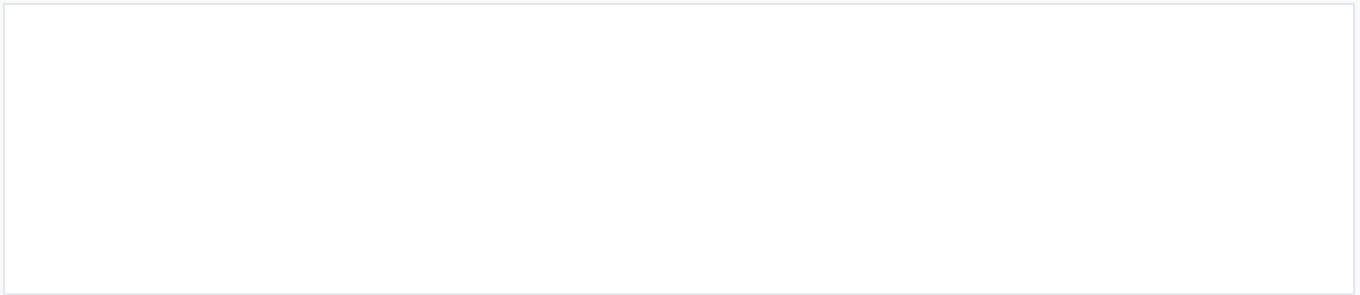

Drive System

Hydraulic drive with motorized feeding and adjustable speed control

Expansion Method

Hydraulic expansion for secure coil holding

Safety & Control

Integrated electrical control panel and motor drive system for precise speed and feeding control.

Safety Systems

Emergency Stop, Overload Protection, Coil End Detection

Control Interface

Integrated electrical control panel for precise adjustments

Service & Support

Service & Support

- 24/7 Pre-sales and After-sales consultant service
- Pre-shipment machine testing and video verification
- On-site technical training and guidance
- One-year warranty period
- Lifelong remote service and technical assistance
- Spare parts provided at cost price after warranty

Quality Compliance

ISO 9001 • CE Certified • SGS Audited

Operational Requirements

Payment Terms

30% T/T deposit, 70% T/T balance after inspection; or Irrevocable LC at sight

Production Lead Time

70 days
