Product Overview

Heavy-Duty Performance

This 10-ton internal combustion counterbalance forklift is engineered for demanding material handling applications in construction sites, warehouses, and industrial facilities. It features a robust design with a CAE-optimized frame, mast, and overhead guard to ensure structural integrity and strength. The machine is designed for both reliability and ease of maintenance, featuring an integrated electronic control box and an 80-degree hood opening angle for convenient inspection.

Technical Specifications

Load Capacity	10 ton
Fuel Configuration	Single Fuel, Dual Fuel

Design & Maintenance

Maintenance Highlights

- 80-degree hood opening angle for easy access
- Integrated electronic control box
- Waterproof and dust-proof electrical components
- Heat insulation and oil pollution isolation

Structural Design

CAE Forward Design • Reinforced Overhead Guard • Heavy-Duty Mast
