

10 x 3/4 x 3/4 Inch Grinding Wheel

This grinding wheel is 10 inches in diameter with a 3/4-inch thickness and a 3/4-inch arbor hole. It is constructed with 39C60-J8VK abrasive grit for efficient and consistent grinding.

Product Overview

Professional Grinding Performance

This 10-inch grinding wheel is engineered with black silicon carbide, making it an ideal choice for grinding materials with low tensile strength. It delivers consistent performance on diverse surfaces including gray cast iron, non-ferrous metals, stone, ceramics, and glass. Designed for durability and precision, this wheel is a reliable component for bench and pedestal grinder setups.

Dimensions

Diameter	10 inch
Thickness	0.75 inch
Arbor Hole	0.75 inch

Technical Specifications

Abrasive Material	Black Silicon Carbide
Grit Specification	39C60-J8VK

Applications

Compatible Materials	Gray Cast Iron, Non-ferrous Metals, Stone, Ceramics, Glass, Refractories, Silicate Materials
----------------------	--

Compatibility

Suitable Equipment

- Bench Grinders
- Pedestal Grinders
