Product Overview

Professional Meter Socket Solution

This 100 Amp Round Meter Base Socket is engineered for reliable residential and light commercial electrical service connections. Constructed with a durable die-cast aluminum enclosure and finished with baked-on epoxy and polyester resins, it offers excellent environmental protection. The internal current-carrying components utilize high-quality copper alloy to ensure efficient conductivity and long-term performance.

Electrical Ratings

Maximum Current

100 A

Rated Current

Voltage Compatibility 120/240VAC

Phase Configuration 1 ϕ 2W, 1 ϕ 3W

Construction & Materials

Enclosure Material	Die-cast aluminum
Finish	Electro-statically applied epoxy and polyester resins
Current Carrying Parts	Copper alloy

Features

Typical Applications

- Residential electrical service
- Light commercial electrical service
- Utility energy measurement

Ground Connector

Serrated clamping surface for positive electrical connection
