

100-Ton Capacity Hydraulic Toe Jack

This lifting jack has a maximum capacity of 100 tons. It is suitable for lifting very heavy machinery.

Product Overview

High-Capacity Hydraulic Toe Jack

This hydraulic toe jack is engineered for demanding industrial lifting applications, offering a versatile range of capacities from 5 tons up to a maximum of 100 tons. Designed specifically for tight spaces where standard jacks cannot fit, the low-profile lifting toe allows for precise access under heavy machinery and equipment. Its robust construction ensures reliable performance, making it an essential tool for heavy-duty maintenance, construction, and equipment relocation tasks.

Performance Specifications

Maximum Capacity

100 tons

Max Capacity

5 tons

Min Capacity

Suitable Applications

Industrial, Construction, Maintenance, Machinery Moving

Design Features

Design Highlights

- Low-clearance lifting toe for tight spaces
- Durable steel construction
- Built-in safety valve to prevent overloading
- Compact design for maneuverability
