Overview

Professional 1000L Brewing System

This high-capacity 1000L stainless steel brewing system is designed for professional use in restaurants, hotels, and micro-breweries. Engineered for reliability and precision, the system features robust stainless steel construction with advanced mirror polishing for hygiene. It offers flexible control options and steam heating, ensuring consistent performance for high-quality beer production.

Technical Specifications

Voltage Options

- 380V (Three Phase)
- 220V (Three Phase)

Capacity per Batch	1000 L
Power Requirement	40 KW
System Weight	4.5 - 5 Tons

Construction & Materials

Material Thickness

3 mm

Inner Wall

2 mm

Outer Wall

Material Composition	SUS304, SUS316, Red Copper (Optional)
Inner Surface Finish	Mirror polishing up to 0.4 micron

Operational Features

Heating Method	Steam heating
Control System	Siemens PLC or Semi-automatic

Compliance & Support

Certifications CE • ISO 9001:2008	
Warranty	3 years
After-sales Service	Engineers available to service machinery overseas

Applications

Suitable Environments

- Restaurant
- Hotel
- Brewpub
- Bar
- Laboratory
- Micro brewery
