

1000mm Wall Saw Blade for Concrete and Masonry

This wall saw blade is designed for precision cutting in concrete, masonry, and other hard materials. It has a 1000mm diameter, 12mm thickness, and 60mm bore size.

Product Overview

Professional Wall Saw Blade

This 1000mm wall saw blade is engineered for high-performance cutting in demanding materials such as cured concrete and brick walls. Designed for professionals, it offers a balance of fast cutting speed and long-term durability. The blade supports both wet and dry cutting applications, providing versatility for various construction and demolition projects.

Technical Specifications

Blade Dimensions

1000 mm

Diameter

12 mm

Thickness

60 mm

Bore Size

Manufacturing Process

Brazed, Hot-pressed

Compatibility and Use

Compatible Machinery

- Angle grinder
- Circular saw
- Table saw
- Masonry saw

Cutting Capabilities

Dry Cutting • Wet Cutting

Compliance and Quality

Certifications

MPA, SGS
