

1000W Double-Ended Metal Halide Lamp

This double-ended metal halide lamp emits 91000 lumens with a color temperature of 6500K and PPF of 1700 $\mu\text{mol}/\text{sec}$. It is designed for enclosed fixtures and offers a one-year warranty.

Product Overview

High-Intensity Lighting Solution

This 1000W double-ended metal halide lamp is engineered for high-intensity lighting applications in industrial and commercial environments. Featuring a clear outer jacket and robust construction, it ensures reliable performance and longevity. The lamp delivers exceptional luminous efficacy and precise color rendering, making it an ideal choice for demanding lighting requirements.

Performance Metrics

Photosynthetic Photon Flux (PPF)

1700 $\mu\text{mol}/\text{sec}$
PPF
