

1008kW Brushless Alternator

This brushless alternator is designed for power generation applications. It features a robust construction ensuring reliable performance and efficient energy conversion.

Overview

High-Capacity Power Generation

This 1008kW brushless alternator is engineered for reliable, high-performance power generation in demanding industrial and commercial environments. Built with premium materials including high-grade copper and specialized steel, it ensures efficient energy conversion and stable voltage output. Designed for durability and longevity, the unit undergoes rigorous testing to guarantee consistent operation and minimal maintenance.

Rated Power Output

1008 kW
Rated Power

Testing Capacity

1500 kW

Construction & Materials

Core Components

Component	Specification
Winding Material	100% Copper
Steel Sheet	Industrial Grade
Insulating Varnish	International Standard
Insulating Paper	International Standard
Bearings	Standard Industrial (Optional Upgrade Available)

Service & Warranty

Support Policy

Free Replacement for Defects • Professional Testing

Warranty Period

2 Years

Packaging

Export-standard Plywooden Case
