

10.0HP Diesel Engine for Generators and Water Pumps

The JD186FA diesel engine is a robust and reliable power source designed for various applications. With a 10.0HP power output, it provides ample power for demanding tasks.

Overview

High-Performance Diesel Power Solution

This 10.0HP diesel engine is a robust and reliable power source engineered for demanding industrial and agricultural applications. Featuring a durable construction and efficient combustion system, it delivers consistent performance and long-lasting operation in various environments. Its compact design ensures easy integration into a wide range of machinery, providing a dependable solution for both power generation and mechanical drive requirements.

Performance Metrics

Power Output

10 HP

Max Power

Technical Specifications

Combustion System

Efficient Combustion • Direct Injection

Model Identifier	JD186FA
Engine Type	Diesel Engine

Applications

Recommended Applications

- Power Generators
- Water Pumps
- Agricultural Equipment
- Construction Machinery

Design Features

Key Design Features	Durable Construction, Compact Design, Easy Integration, Reliable Mechanical Drive
