

# 100kg Barrier Washing Machine for Hospital Use

This 100kg barrier washing machine is designed for hospital and cleanroom environments. It prevents cross-contamination between clean and soiled laundry areas with its specialized design.

## ADDITIONAL IMAGES

## Product Overview

### Professional 100kg Barrier Washer-Extractor

This industrial-grade barrier washing machine is specifically designed for hospitals and cleanroom environments to prevent cross-contamination between soiled and clean laundry. Featuring a robust 304 stainless steel construction and a high-capacity 100kg drum, it combines washing and extracting functions into a single, efficient unit. The advanced micro-computer control system offers programmable cycles and significant energy savings, making it an ideal solution for high-standard healthcare and hospitality laundry operations.

## Key Performance Metrics

### Featured Specifications

**100 kg**

Maximum Capacity

**1 year**

Warranty Period

**304**

Stainless Steel Grade

## Technical Features

### Control System

- Touch-type programmable computer control
- Large LED process display
- Customizable wash and rinse cycles
- Pre-programmed cycle flexibility

### Machine Type

Automatic-fully washing and extracting barrier machine

### Heating Method

Steam Heating, Electrical Heating

## Construction & Design

### Design Features

- Complete suspension structure to reduce shock
- Liquid pressure buffer with springs for floor stability
- Single door structure for convenient loading/unloading
- Fully-closed rear-drainage structure

### Materials

Drum and body all made of high-quality 304 stainless steel

## Compliance & Applications

### Certifications

CE • ISO 9001

### Ideal Applications

Hospitals, Hotels, Schools, Restaurants, Laundry Houses, Cleanrooms

## Model Range

### Available Capacity Range

#### Model Series

XPQ / XTQ Series

#### Capacity Options

15kg, 20kg, 30kg, 50kg, 70kg, 100kg
