

100kVA Silent Diesel Generator Set

This 100kVA diesel generator set offers 50Hz/60Hz frequency and 230V/400V voltage options with a 0.8pf. It features a soundproof canopy for quiet operation in diverse settings.

Overview

Reliable Power Generation

This 100kVA silent diesel generator set is engineered for consistent and efficient power delivery in demanding environments. Housed in a specialized soundproof canopy, it significantly minimizes noise pollution, making it an ideal solution for industrial, commercial, and residential applications requiring quiet operation. The unit is equipped with a comprehensive control panel that provides real-time monitoring of critical engine and electrical parameters.

Compliance & Quality Standards

CE, ISO 9001, ISO 9001:2009, SGS, TÜV, CQC

Features

Operational Features

- Silent operation canopy
- Integrated digital control panel
- Real-time voltage monitoring
- Frequency and current tracking
- Engine parameter diagnostics
