

# 100L Belt-Driven Air Compressor for Heavy-Duty Applications

This belt-driven air compressor is designed for professional and heavy-duty applications. With a 100-liter tank capacity, it provides ample air supply for various pneumatic tools and equipment.

## ADDITIONAL IMAGES

## Overview

### Heavy-Duty Belt-Driven Performance

This 100L belt-driven air compressor is engineered for demanding professional and industrial environments. Featuring a robust cast-iron cylinder construction and a high-efficiency belt-drive mechanism, it delivers consistent power for pneumatic tools and workshop operations. With a 100-liter capacity and rapid refill times, it provides a reliable air source for garages and industrial settings requiring sustained performance.

## Technical Specifications

Rated Voltage	220-240V~ 50Hz
Input Power	2.2 kW
Rated Speed	1100 rpm

## Performance Metrics

### Key Performance Metrics

<b>100 L</b> Tank Volume	<b>8 bar</b> Max Pressure	<b>199 L/min</b> Air Delivery
Gas-filled Time	290 s	

## Construction & Design

### Cylinder Configuration

Metric	Value
Material	Cast Iron
Quantity	2
Diameter	55mm
Stroke	38mm

### Tank Dimensions (D\*L\*T)

350mm \* 835mm \* 3.0mm

## Components & Accessories

### Included Components

- 1x Pressure Regulator (0-8 Bar)
- 2x Quick Couplers
- 2x Pressure Gauges
- 1x Check Valve
