

# 100L Micro Beer Brewing System

This micro beer brewing system has a 100-liter capacity. It integrates mashing, boiling, fermentation, and temperature control for efficient small-scale beer production.

## Product Overview

### Professional Micro Brewing Solution

This 100L Micro Beer Brewing System is designed for high-quality, small-scale beer production, making it an ideal choice for pubs, restaurants, and craft brewing setups. The complete equipment suite includes integrated milling, saccharification, fermentation, and refrigeration modules for a streamlined workflow. Built with professional-grade materials, it ensures consistent and precise brewing results.

## Technical Specifications

Capacity	100 L
Construction Materials	SUS304 Stainless Steel, Red Copper
Primary Processing	Fermenting

## System Components

### Included Equipment Modules

- Milling System
- Saccharification System
- Fermentation System
- Refrigeration System
- Washing and Sterilization System
- Control System

## Logistics

Place of Origin	Shandong, China
Lead Time	35 days
Packaging	Wooden case or equivalent protective packaging
