Product Overview

High-Efficiency Mixed Flow Ventilation

This 100mm mixed flow inline duct fan is engineered for effective ventilation in residential or commercial settings. It combines a compact design with robust performance, delivering a consistent airflow of 205 m³/h while maintaining a low noise profile of 30dB(A). Designed for reliability, this unit is IP44 rated, ensuring protection against solid objects and water splashes, making it a versatile choice for ducted air systems.
