

# 100W Monocrystalline Solar Panel

This solar panel is widely used in off-grid solar systems, providing power for households and solar street lights. It is also suitable for caravans and yachts.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Energy Solution

This 100W monocrystalline solar panel is engineered for high-efficiency energy conversion in diverse renewable applications. Designed for durability and consistent performance, it is suitable for both residential and industrial on-grid or off-grid power systems. Its robust construction ensures reliability even in harsh environmental conditions, making it an ideal choice for charging batteries or powering small appliances.

## Technical Specifications

### Rated Power

**100 W**

Power Output

### Cell Technology

Monocrystalline Silicon

## Applications

### Suitable Applications

Residential, Commercial, Industrial, Off-Grid Systems, On-Grid Systems, RV & Marine

## Key Features

### Durability & Reliability

- Robust construction for long-term reliability
- Engineered for harsh weather conditions
- Consistent performance in diverse environments
- Suitable for battery charging and appliance power
