

1010W Rotary Hammer Drill for Concrete and Masonry

This rotary hammer features a powerful 1010W motor. It is designed for heavy-duty drilling and demolition in concrete, masonry, and stone.

Product Overview

High-Performance Rotary Hammer

This professional-grade rotary hammer is engineered for demanding tasks in concrete, masonry, and stone environments. Equipped with a robust 1010W motor, it delivers consistent impact force for heavy-duty drilling and light demolition work. Designed for versatility and endurance, it features an ergonomic build and multiple operating modes to suit various industrial and construction applications.

Performance Specifications

Rated Input Power

1010 W
Motor Power

Impact Force	4 J
Impact Rating	4000 bpm
No Load Speed	800 rpm

Technical Details

Operating Modes

Three Functions

Voltage/Frequency	230V~/50Hz
Chuck System	SDS plus
