

10.8V Cordless Two-Speed Power Drill

This 10.8V cordless drill is designed for drilling and fastening. It features a two-speed gearbox for versatility across different materials and applications.

Product Overview

Compact Power and Versatility

The 10.8V Cordless 2-Speed Drill is a compact and lightweight power tool designed for a variety of drilling and fastening applications. It features a two-speed gearbox, providing versatility for different materials and tasks, while the adjustable clutch helps prevent overdriving screws and damaging work surfaces. Its cordless design offers freedom of movement, making it an ideal choice for working in tight spaces and remote locations.
