Product Overview

High-Performance Marine Illumination

This 108W underwater LED light is engineered for demanding marine environments, providing high-intensity illumination for yachts, boats, and docks. Constructed with a 316L stainless steel housing and tempered glass cover, it offers superior corrosion resistance and durability in both fresh and saltwater. The IP68 waterproof rating and built-in protection circuits ensure reliable, long-term performance for enhancing vessel aesthetics and nighttime safety.

Technical Specifications

Precision-engineered LED array ensures high luminous efficiency and wide 120-degree coverage.

Power Consumption

108 W

Rated Power

LED Chip Options

- C-REE
- Epistar

Supply Voltage

DC 12V, DC 24V

Emitting Angle

120 °

Durability & Protection

High-intensity 108W LED light with corrosion-resistant 316L stainless steel housing.

IP68 rated waterproof construction suitable for prolonged submersion in harsh marine conditions.

Waterproof Grade

IP68

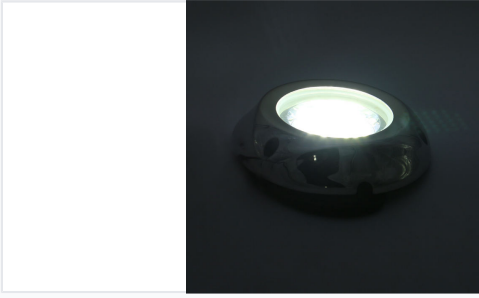

Construction Materials

| Component | Material |
|---------------|----------------------|
| Shell/Housing | 316L Stainless Steel |
| Cover | Tempered Glass |

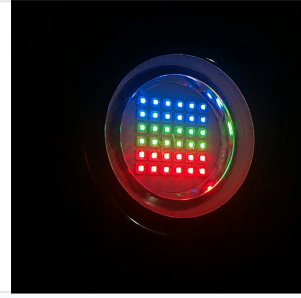

Built-in Protections

- Over-Current Protection
- Short-Circuit Protection
- Over-Temperature Protection
- Over-Voltage Protection

Lighting Options

Vibrant blue light output provides stunning aesthetics for yachts and boats at night.

Available in multiple colors including RGBW for customizable underwater lighting effects.

Emitting Colors

White, Red, Green, Blue, Dual Color, RGB, RGBW

Service Life

50000 hours

Applications

Typical installation on a boat transom for illuminating the wake and surrounding water.

Enhance visibility and safety while creating a luxury look for marine vessels.

Recommended Applications

- Boat & Yacht Underwater Lighting
- Submarine Applications
- Docks and Marinas
- Ponds and Swimming Pools
- Fountains
